Welcome to Jupyterhub @ DKRZ!

Jupyterhub is a multi-user server for Jupyter notebooks that allows to execute the notebook directly on the DKRZ HPC system Mistral. It therefore also supports the execution of parallel computation.

> Note:
>
> JupyterHub is available at https://jh-test.dkrz.de for all DKRZ users who have access to Mistral and who are allowed to submit batch jobs.

> Warning:
>
> DKRZ operates the jupyterhub server in extended testing phase, which means that we do not guarantee fulltime availabilty of the system and some more limitations documented here.
